Re: Site Inspection at Systech Liquid Treatment Facility,  
Franklin, OH

Dear Mr. Evers:

Since we have not had much luck connecting with each other on the telephone I decided to send you a letter. Ecology and Environment, Inc. has been retained by the U.S. Environmental Protection Agency for the purpose of evaluating candidate sites for the National Priorities List under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Superfund Amendments and Reauthorization Act (SARA). I have enclosed a copy of the Letter of Introduction provided by the U.S. EPA for Ecology and Environment, Inc. employees engaged in field investigations, this outlines the statutory basis for our work.

On May 12 - 13, 1987, Ecology and Environment, Inc. performed a site inspection at the old Systech Liquid Treatment Corp. facility located at Baxter Road and Highway 73, Franklin, OH. During the site inspection Mr. Thomas Wittman and Mr. Stephen Zimmer of Systech Corp. indicated that Tricil, Inc. has the records with the quantities of liquid wastes which were treated at the Systech Liquid Treatment facility. This information is needed in order to complete our site inspection report.

Please send me a letter with information regarding the quantities of liquid wastes treated at the facility during its 1974 - 1978 operation. If possible, break down the quantities for specific wastes such as plating wastes, acid/bases, etc. In addition, please include information on the quantities of solvents from the solvent recovery process, break down the quantities for specific solvents if possible.

Mr. Carl Evers

Thank you for your help in gathering this information. If you have any questions do not hesitate to call me at (312) 663-9415.

Sincerely,

ECOLOGY & ENVIRONMENT, INC.

Thomas C. Sullivan
